SUBJECT: BLUE LANTERN LEVEL 3: POST-SHIPMENT END-USE CHECK
ON LICENSE 050115687

REF: 2006 BLUE LANTERN GUIDEBOOK

11. This is an Action Request. See paragraphs 2-4.

12. The Department's Office of Defense Trade Controls Compliance (PM/DTCC) requests post's assistance in conducting a post-shipment check on application 050115687 for the export of accelerometers to South Africa. Post is requested to complete this Blue Lantern check within 45 days. Lack of response to a Blue Lantern check will affect pending and future licenses involving parties to this license.

13. Reason for request: Sensitivity of commodity and unfamiliar foreign intermediate consignee, Advanced Sensors Calibration GmbH. The company has appeared on a previous license application but the bona fides of the company have not been verified by a Blue Lantern check.

14. ACTION PRETORIA: Embassy is requested to make inquiries with appropriate host government officials to determine if the South African DoD ordered and has received the accelerometers and if so, confirm that the articles will be used for the purpose stated on the license. Automated Export Data (AES) indicates that items worth \$30,243 were shipped from the U.S. on 13 September 2008.

15. ACTION BERLIN: Department also requests that Embassy make appropriate inquiries to verify the bona fides of foreign intermediate consignee Advanced Sensors Calibration GmbH, and to confirm the legitimacy of this transaction. PM/DTCC also requests that post conducts a site visit to the company in order to provide Department with an assessment of its business operations and on-site security. Finally, post is asked to assess whether the company appears to be a reliable recipient of USML items. If a site visit is not possible, please inform the PM/DTCC officer.

The following questions are provided as suggested guidance:

--Does the company have supporting documentation for this proposed transaction?

--Does the company have secure facilities and proper accounting and security procedures for handling sensitive USML items?

--Will Advanced Sensors Calibration GmbH retain positive control over the accelerometers at all times?

--When was the company established and who are its principals?

--What is the nature of its business -- what type of items does it handle, does it serve as a broker?

--What type of organizations are among its typical customers and where are the customers located?

--Does the company understand the restrictions on United States Munitions List (USML) items, especially the prohibition against unauthorized re-transfers and re-exports?

END ACTION
